Ecommerce Sales Analysis Dashboard

A comprehensive data-driven evaluation of sales performance, profitability, and market trends using Microsoft Excel.

Executive Summary

$2.3M	$286K	12.47%	10K
Total Sales	Total Profit	Profit Margin	Orders
20.62% year-over-year growth	14.41% year-over-year growth	5.15% decrease from previous year	28.64% year-over-year growth

The business generated $2.29M in total sales with an overall profit margin of 12.47%, indicating moderate profitability. Sales increased significantly during the last quarter, likely driven by seasonal demand and holiday sales.

Sales and Profit Trends

Monthly Performance

Sales and profit generally increase toward the end of the year, especially in the last quarter. The increase in sales during final months indicates seasonal demand or holiday sales impact.

Key Observations

- Sales peak in November and December
- Profit follows sales trend but fluctuates
- Consistent monthly growth pattern

Category Profit Analysis

Technology

$145,455 profit

Highest profit category

Office Supplies

$122,491 profit

Moderate profit levels

Furniture

$18,451 profit

Lowest profit margin

Technology category generates the highest profit, while furniture produces the lowest profit compared to its sales volume. This suggests furniture products may have lower profit margins or higher operational costs.

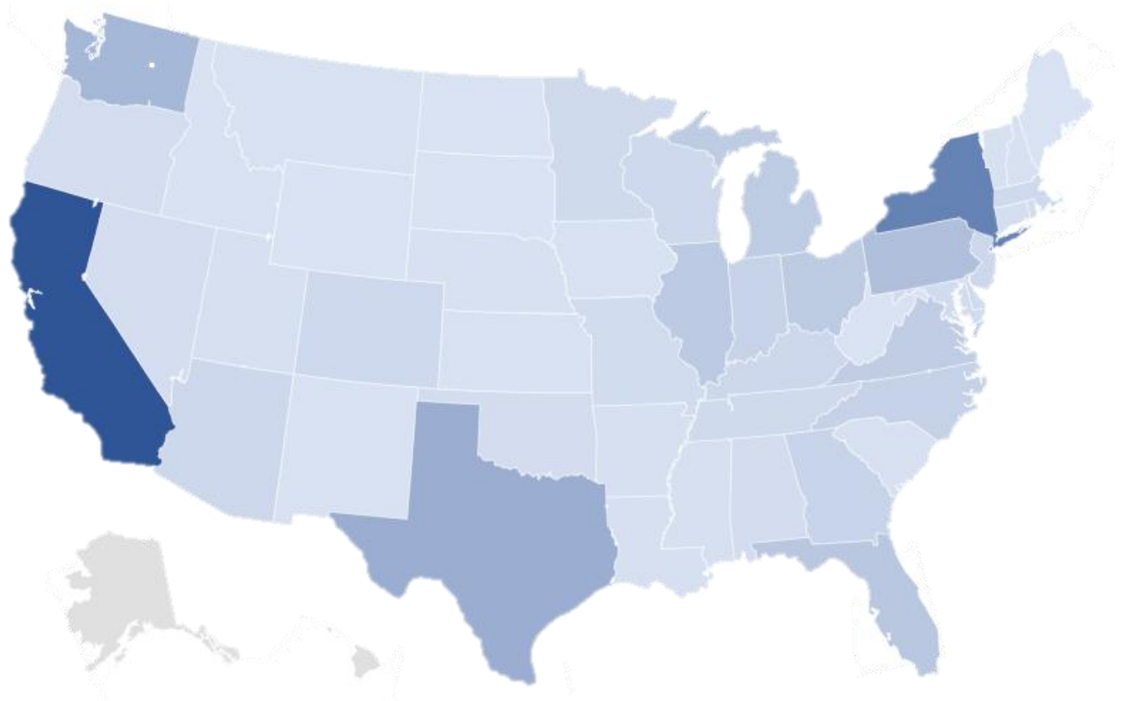
Geographic Sales Analysis



Regional Performance

Western states, especially California, generate the highest sales. The choropleth map visualization shows geographic distribution of sales using a color gradient from light to dark blue.

Key Findings

- California leads with $457,688 sales
- Western region shows strongest demand
- Central states show lower performance

Key Business Insights

01

Strong Revenue Growth

$2.29M in sales with 20.62% year-over-year growth and 28.64% increase in order volume

02

Profitability Challenge

Profit margin decreased 5.15% despite revenue growth, indicating pricing or cost issues

03

Category Performance

Technology is most profitable, while furniture has low margins despite high sales volume

04

Geographic Opportunity

Western states contribute highest revenue, suggesting expansion opportunities in high-demand regions

05

Seasonal Pattern

Significant sales increase in last quarter indicates strong holiday season impact

Made with GAMMA

Strategic Recommendations

Focus on High Profit

Increase marketing for Technology products

Optimize Pricing

Implement better pricing strategy to improve margins

Expand Regions

Focus campaigns on Western high-demand areas

Improve Furniture

Analyze and optimize furniture product margins

These recommendations can improve business performance by focusing on high-profit categories, optimizing discount strategies, expanding in high-performing regions, and improving low-margin product categories.
